

REMARKS

Claims 11, 13 and 14 have been amended. No new matter has been added. Consideration of the amended application is respectfully requested.

In the non-final Office Action mailed April 14, 2006, newly cited reference U.S. Patent No. 6,808,298 to Christensen was applied against claims 11, 13 and 14 under 35 U.S.C. §102 as being anticipatory. Claims 11, 13 and 14 have been amended to recite that the headlight assembly being claimed is a central headlight assembly. Similarly, the claims also recite a central headlight housing. Applicant submits that amended claims 11, 13 and 14 define over Christensen, and are now allowable.

Christensen teaches a headlight system for a two or three wheeled vehicle which is auxiliary to the main, stationary, central headlight, and is designed to give the appearance of a four wheeled vehicle by presenting spaced apart headlights mounted on a horizontal rod. Christensen is silent on the configuration of the central headlight, and therefore cannot anticipate amended claims 11, 13 and 14 which recite adjustability of the central headlight. Christensen is concerned with giving the motorcycle the appearance of a four wheeled vehicle by mounting a horizontal rod on the front forks and providing a pair of spaced apart headlights that extend outward from the central headlight. Christensen does teach adjustability of the horizontal member on which this extra set of headlights is mounted. However, since Christensen does not provide any information about the primary, central headlight, Christensen fails to teach or even suggest the invention claimed in claims 11, 13 and 14.

Claims 1-10 are again indicated to be allowable.

Based on the foregoing, applicant submits that this application is in condition for allowance and a Notice to that effect is earnestly solicited.

If the Examiner believes that a conference would be of value in expediting the prosecution of this application she is invited to telephone undersigned counsel for applicant.

Respectfully submitted,

PLUMSEA LAW GROUP, LLC
